**Applicant's Note:** For my PhD applications, I am applying to the "Broad AI" initiative (symbolic + subsymbolic AI) at Johannes Kepler as well as the new IT-U's "Computational X" impact-oriented programs in Linz, in addition to int'l (US-based) programs where I believe I would be a good fit in the '24/25 cycle.

Since I am applying before completion of my Master's degree, I understand I am applying for conditional acceptance, especially in AT/EU where the Masters degree is required for PhD program entry, or as determined by the application target institution.
